Self-sufficient agricultural operations:

- Aligned With Slow Food Objectives
<https://slowfoodusa.org>
- Chomp Energy, small-scale on the farm greenwaste digester system
<https://www.chomp.energy>
- Qualterra Energy, small-scale on the farm wood gasifier & biochar system
<https://www.qualterraag.com>

Nutrient-rich, organic soil:

- Reduce use of commercial petroleum-based, synthetic fertilizers
- Reduce pesticide applications
- Increase long-term crop yields
- Reduce top soil depletion/ erosion
- Increase irrigation efficiency through enhanced water and nutrient retention in biochar
- Increase root zone soil tilth

Environmental Mitigation:

- Improve air, water and soil quality through sound biomass residue stream management
- Carbon sequestration green credits via tree farms production & other crops
