The California Biomass Atlas

Harnessing The Carbon Cycle To Improve Our Air, Water, Soil And Economy

From its inception, The Ag Biomass Foundation members have defined the publishing of The California Biomass Atlas as one of their primary contributions to waste stream mitigation and soil remediation to secure long term benefits to California's air, water, soils, and food. With the significant body of data held by the The Ag Biomass Foundation being composed into an accessible, comprehensive survey of the technology, facts, and applications of biomass mitigation and soil health improvement The California Biomass Atlas is now being written for publication in 2015 to coincide with the United Nations granting of 2015 as the Global Year of The Soils.

Funding for the writing and publishing of the atlas will be provided by donations from sponsors whose organization or business will be credited in the publication and on the AgBiomassFoundation.org website. All sponsor donations are tax deductible. The California Biomass Atlas will be a paperback book printed in the USA on 100% recycled paper at a green printing facility.

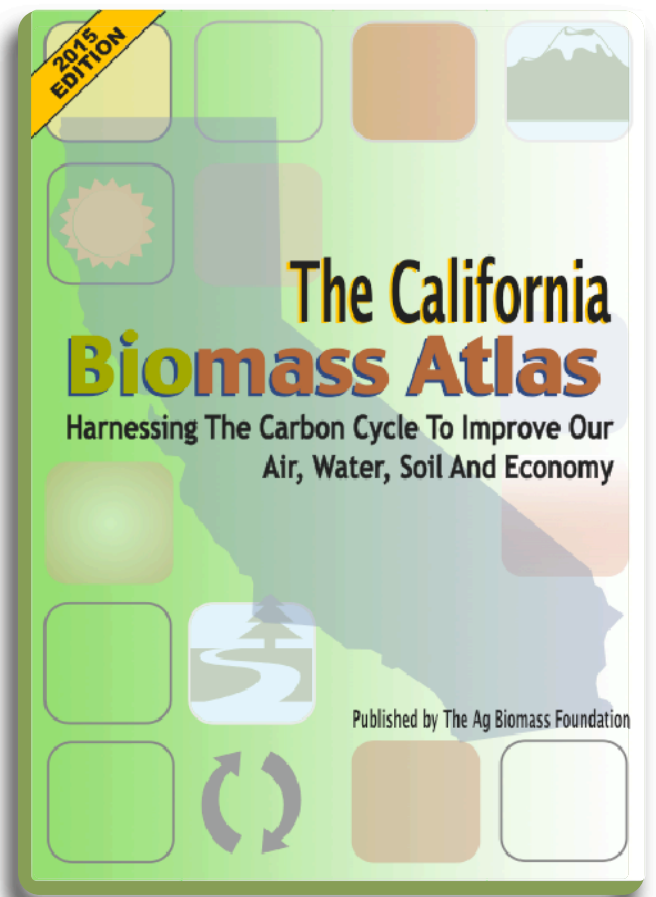

Make a Donation

Your support is needed to share this information for California. Sponsors of The California Biomass Atlas will be represented in the printed atlas as follows and displayed at agbiomassfoundation.org.

I. Donations of \$500. - \$1000. Line listing of sponsor's organization or company name in bold font and subtitle line of their services or products.

II. Donations of \$1001. - \$2000. Sponsor's logo with company or organization name in bold font and subtitle line of their services or products.

Harnessing The Carbon Cycle To Improve Our Air, Water, Soil And Economy

Author Lisa Lucas

I am proud to be working with the Ag Biomass Foundation as their primary author of *The California Biomass Atlas*. Throughout my career of 25 years in writing, design and marketing I have sought projects that I believe have value. Drawing on, and refining the extensive data base of the ABF to create *The California Biomass Atlas* is one such calling. Utilizing my background of authorship skills as a published writer, a college instructor of 14 years, and my degree in information and communication studies, I look forward to bringing the finished manuscript to publication.

Publishing and Writing

2010 to Present

Technical writing for numerous organizations and businesses ranging from website content to executive summaries.

2014 Contributing author for article on eco-couture for Belle Armoire Magazine, the premier national publication for high design hand couture.

2009 Author and graphic designer of *Is Graphic Design & Digital Arts The Profession For You?* A comprehensive overview of the field of graphic design and digital arts. Available in paperback and e-book formats.

1999 to 2001 Contributing graphic designer of 15 books for Prima Publishing until 2001 when they were purchased by Random House.

1992 Author and publisher of *The Authentic Victorian Craft Guide*.

1989 to 2004 Faculty Member, Butte College, Oroville, CA. Co-developed and wrote program curriculum, course content, syllabi, lectures, etc. for graphic design program.
